Would You Put This Bearing In Your Engine?

Think of the friction and heat and damage that rough bearings would cause. You wouldn't use them on a bet. But common "rough" lubricating oil is almost as destructive. There are tiny hard globules in it that give smooth bearings almost the effect of being rough.

By a secret and exclusive treatment they are softened to cream like amountmess. in Gold Crown Oil. This makes it as much supergor to most oils for lubricating as soft water is to hard water, for washing. It forms a perfect cushion around every part and reduces friction to almost nothing. Also, this wonderful process makes Gold Crown Oil highly resistant to heat evaporation common "rough" oils evaporating half again as fast. And Gold Crown forms little carbon.

Gold Crown Oil is always dependable, always uniform in quality. Made of Muskogee crude by the oldest refinery in the state.
